Special Report Of a Committee appointed by a meeting of the citizens of Edgesield to propose a plan for a

system of Police and Patrol, and a military organization (which Report and plan have been adopted.)

PUBLISHED BY ORDER OF THE MERTING.

Your Committee have felt much embarrasmen in the performance of the duties which have been assigned them. They have been selected to pro pose for your adoption a plan for the formation of s military organisation which is to include all those who are willing, in this pressing emergency to enrell themselves as members of your association, and to be in readiness to perform any duties which may fall to their lot in the common defence. It is no holiday show in which we are about to engage. It is true that no immediate danger is to be apprehended from the army of the enemy, but we have all seen enough, in the last three wooks, to be convinced that no part of our country is safe, unless protected by the presence of a large military force. In this time of danger, then, it is our duty, and it should be our privilege, to prepare for any military exigency that may arise. It will be too late to sound the tocsin of alarm when our villages are smekingour fields ravaged, -our household Gods destroyed, and our virgins violated. These things, of course, we are not able to foresce, but we are able to prepare for them before band, so that if they do come we may be able to meet them with a determined front, and confident hearts.

The enly manner in which we can effect this determination, and bring about this monfidence is for us to form ourselves, at once, into some kind of military organization, which shall be commanded by good and true men; and in which every one, whose heart shall prompt him to protect every thing that is most dear and sacred, shall have a place. For this organization the most practical plan-is the best, and the most simple is the most practical. Your Committee have therefore adopted for your consideration a short and simple basis of a military organization, which they trust will meet with your approval. In this plan, it is perhaps needless to say, that they have been governed solely by their desire for the good of the community, and by the hope that they would thereby be enabled to effect some thing looking towards an organized military defence, should the occasion ever arise.

Before the presentation of the plan which they have adepted, your Committee deem it their duty to notice, in a few words, the objects of this intended organization, and to answer, as best they may be able, the various objections which they have heard urged against it.

Although, as must be evident to every one, the whole community, individually, and collectively, are interested in this matter, there has seemed to be an almost universal spathy and leathargy pervading all classes as to the object for which your meetings have been called. Although they must know that the enemy is near us, and that, (being dependent almost entirely for his supplies upon the country surrounding his line of march-it is possible-nay probablethat he may come into our own District, there to earry on bis work of devastation, the citizens are resting quietly under the shade of their own vine and fig tree, as if they possessed some special immunity from the menstrons pillage and carnage carried on by the enemy. Various causes may have conduced to this result. Up to this time ou . State has been singularly blessed in her escape from the wholesale work of murder and violence which has been visited upon our sister States, but can our citizens suppose that their affairs is to continue during the war? Do ot know that whenever, in the fortune of ha enemy may become possessed of our co .utry, the scenes of bloodshed which will then be enacted cannot be equalled by those recorded oh any page of history? Doshey suppose that the enemy do not know that the District of Edgefield, in particular, has always been clamoring for a separation from her base and upprincipled Northern kindred? Do they suppose that the enemy have forgotten the District which sent forth a Bunten, a Brooks and a Pickens?. If they do then wee be to them when the enemy shall awake to their recollection

of these things. Some of our citizens have said that there is no use for a military organization, for the reason that we are so very weak that we can never effect any thing in the shape of defence. A good reason-truly; a reason, which, had it been urged upon our armies in the field before the battles of Bull Run and Managers would have lost us entirely those buttles, as well as many others. If we are wenk we can become stronger by union and organization. We can prepare to meet the enemy, if they should come, in some kind of order, and should we at last not be able to protect our wives and our children, we san at least die with konor before them, and carry with us the respect of our countrymen.

more serious one, which has been urged against tion in the shortest possible space of time. Your There is another objection, however, and a the proposed organization, and that is that we cannot make those interested perform the duties required of them unless we have the authority of law. This, your Committee are unwilling to believe-they cannot believe that the men who battle-field, there to encounter the enemy, face der orders to co-operate with the Squads of the to face, and heart to heart, in the very fury of proposed Society, in any manner that the occahis hate, will shrink, in any manner, or refuse to perform their alloted share in the troubles which have come upon our beloved country. It cannot be possible that when our citizens know that our you may take in the premises should be taken worst enemy is near us, and perhaps, with rapid at once. The occasion demands promptness and strides, is gatheging around our very fire-sides activity, and it also demands that we should one and hearth-stones-when they know that hun- and all act together, with barmony and concord. dreds and thousands of our countrymen are now houseless and homeless, flying frem the track of this monstrous destroyer-when they know that our mearest city is even now fearfully trembling in the scales of destiny, and ere long may be called on to bear her part in a bloody and remorseless struggle-perhaps to arise with a mien erect and brow defiant-perhaps to show but the hot smoke of her burning dwellings-it carrot be possible that in times like these, cur citizens will wait for the penalty of the law before they will organize and prepere to defend their wives and their children-

We all have our allotted task. To those of us who are debarred the dear and holy privilege of defending our country on the field of battle, has fallen the lot of protecting there who are unable to protect themselves.

Our sons and our brothers, and all of our kindred have made for themselves an immertal record-let as be careful that our Enties shall be well performed—that we may not blush to meet them when they return. Respectfully submitted.

B. C. BRYAN, Intendant. M. FRAZIER, Capt. Beat Co. F. J. MOSES, Jr., Enr'ng Officer. Committee.

THE PROPOSED PLAN FOR A SYSTEM OF

have come to the conclusion that the following is

the best plan that you can adopt, for patrol purposes, and for a military organization.

They recommend that all citizens who are at home, and who doem it their duty to organize, in the present emergency, should immediately form themselves into a permanent Society, to last during the war, whose objects shall be to preserve, as far as they are able, the proper police and patiel of the country, and, in the event of any sudden invasion of raiding parties from

the enemy, to protect the women and children. Let this Society be formed, under the name and style of "The Confederate League," and call upon all good and true men, within a radius of say, seven miles from this Court House, to enroll themselves as members thereof. Let this Society, as soon as formed, elect their Officers from among the members, to wit : President, Vice-President, Secretary and Treasurer; and let a Select Cemmittee be appointed to propose a written Constitution and By-Laws for the Government of the said Society. - Let a Minute Book be kept by the Secretary, in which the said Constitution and By-Laws shall be inscribed, and let the name of each member, as he proposes himself for membership, be enrolled in the said book; and let him be required, on becoming a member, to take an eath that he shall faithfully and promptly comply, in every particular, with the said Constitution and By-Laws, and that he will not fail, in any respect, to obey the orders that may be given him by the properly constituted Officers of the said Society.

When the Society is formed, and the election of Officers has taken place, let the President thereof select, out of the names on the roll, so many names (to be erdered by the Society) from among them as he thinks will make prompt, and saithful Chiefs, and let all the members of the Society then be formed into Squads of three (each Squad to consist of the members living nearest each other) by the President, by and with the advice and concurrence of the Society, and let each one of the Chiefs, named by the President, be assigned to the command of one of the Squads, each Chief being placed in command of the Squad, the members of which live nearest to him. Let this organization of Equads be entered in the Minute Book kept by the Secretary, for the ready information of the President and members; and let each Chief, with his Squad, take his turn of patrolling the country, at night, for seven miles around the centre of the squad line. This will ensure the tranquility of the country, so far as regards the travelling of negroes, and will also be beneficial in giving an opportunity to these Squads of capturing any escaped Federal prisoners, with which our District seems to be flooded.

The Secretary of the Society should be required, by direction of the President, to give notice before-hand, in writing, to the several Chiefs of Squads, as to when their various tours of duty.

will come round. The proposed Society may in the course of events, be at some expense to carry, out its objects; and, to mest this probable expense, it is respectfully recommended that each member thereof, on joining the same, shall be required to pay, as it were, an initiation fce, into the hands of the Treasurer, with which amount each member, on paying the same, shall be credited on the

So far as the civil (that is, the patrol) part of this organization is concerned, the members should all be under the direct orders of the President thereof, but should any military exigency arise they should be required to connect themselves with the Beat Company of this Village, under the command of its present Captain. This would swell the ranks of the said Company into a useful military organization, and would give it much more strength and efficiency than it has at present.

It should also be determined by the Saciety as to what signal shall be given if any invasion or raid by the enemy should be attempted. This signal should be one which can be seen and understood at a distance; and it should also be kept secret in the Society, so that it might not become entirely useless to us. in the event that we should have among us any secret enemits.

The foregoing remarks amurace a most simple and plain plan for an organization, such as we require, and your Committee have attempted to present it in such a manner that it way be enlarged upon, or detracted from, as, in your better A correspondent of the Constitutionalist, judgment, may seem meet and proper.

Your Committee would respectfully recommend that all citizens in other parts of the District, not embraced in the proposed radius, should be invited and urged by you to inaugurate for themselves a plan similar to the one we propose, se that, in any pressing emergency, we may be able to act together, and give to any part of the District as rough aid and assistance as may be compatible with our own is mediate defence.

In regard to a system of couriers, which has been proposed in your meetings, your Committee would report that they have conferred with the Enrolling Chicer of the District, and that he proposes to save you all the trouble and expense, involved in such a system, by inaugurating the same himself. He promises, in the event of an emergency, to give us the most accurate informs-Committee would therefore recommend that this part of the organization be left with him.

He has also informed your Committee that he has, already organized and under orders, Squads of his Supporting Force in the various portions of the District, which Squads will be placed unsion may seem to require.

In conclusion, your Committee would respectfuly, but earnestly, recommend that whatever action-Respectfully submitted,

East and West, the enem

Incidents of Sherman Retreat through Georgia.

A correspondent of the Macon Telegrapi gives that journal the annexed account of some of the diabolical deeds committed by Sherman's vandals on their retreat through

The enemy carried off a large number of ble bodied negroes, many of whom, however, have returned to their masters. All good looking colored girls were carried off by the In one instance a girl, nearly white, was taken, and when her husband, a slave, attempted to follow and reclaim her, he was ruthlessly killed. She was free and under the control Mr. J. H. Jones, the hotel keeper. at Gordon.

In some instances Churches and Masonic Lodges were burnt. The church at Griswoldville was burnt and the Masonic Lodge at Gordon shared the same fate-with all the records, jewelry, &c., belonging to the Lodge. The Wayside Home at Gordon was

also destroyed. one young lady of good family was ravished by negroes with the army, and in two other instances attempts to commit violence

were made. Mr. David Solomon, an old and respects ble citizen, was twice swung up, in his own house, to make him reveal where his money was hid. He at last informed them. . They carried off some five thousand dol-

lars in specie, and burnt a large amount of Confederate money. His loss was heavier than any other citizen of the place. They also robbed the estate of J. H. Foun-

tain of \$5000 in specie, besides a large amount of Confederate currency.

Mr. Baker's house, two miles from Gris

woldville, was occupied by the enemy as a hospital. Their wounded were quartered there, and Mrs. Baker turned out of doors. When the Yankees left, they burned the house, giving as a reason for so doing, that it was deserted. Gen. Howard said to the people that he

was sorry to destroy their property, but that he thought it the best thing he could do. That our leaders had to be convinced that they must seenmb, and the surest way to compel their return to the Union was to create such distress among the people, as would cause them to demand reconstruction. He said he thought he was doing God's work.

He also took down the names of those whom he had despoiled, and promised to send them provisions as soon as he reached He remarked that by that time Savannah. they would be submissive and he would then see that they did not suffer.

.The Augusta Register says:

A gentleman arrived in this city yesterday evening who left Milledgeville on Tues-day merning. He says the State House, Executive Mansion and Milledgeville Hotel have not been burned. The Depot, Penitentiary and Arsenal were alle the buildings that were burned. They burn all gramaries and cotton they find in the country; and kill or carry off every living thing that could possibly serve for food. The country is left a barren waste. Many families that one week ago were comparatively wealthy have not now the means of sustenance.

But the most hellish deeds that the infernal demons committed remains to be told, and we think the paper should blush that bears the record. We are informed that the incarnate devils ravished some of the nicest ladies in the town. We pen the paragraph with horror. Our blood runs cold as we write. We would forbean doing so, but we wish our people to know the destiny that awalts them if the villians are allowed to continue their invasion of the country. One of their unfortunate victims was, we learn, consigned to the asylum on Monday. Her reason tottered beneath the load of wounded bonor, and the poor victim is ruined forever. How long! oh, how long is our country to be insulted by these savages? In the name of justice and humanity we urge our people to vindicate their honor,

To our armies we would say, write on your battle flags, in broad, black letters, Avenge the Honor of our Women! Let it be emblazoned before the eye of every soldier, and in the hour of conflict let it be the bathle cry that goads our men ex to deeds of valor which will crush out the foe and leave not a ve tige of them save a great stench in the land. noticing some of the damdable acts of Sher-

man's army, concludes thus: But the spirit of the people has not been demoralized by this the greatest Yankee raid of the war-the most remarkable in history truly remarkable, if it is permitted to reach the sea without being ruined. Our people are more defiant and more united than ever. Some admit of a taint of reconstruction heretofore, but now they raise the cry of independence or death. Our women, especially, are more nerved than ever to work, to suffer, and to pray, for our cause. In this sense the march of Sherman through Georgia will accomplish good. Another good sign; the people are not dopressed as when Donelson and Vicksberg fell, but more hopeful of final results than they have heretofore been under reverses.

Wheeler's Late Battle.

From the Savannah Republican, December 6 Hardly a day has passed that Wheeler has not engaged some portion of Sherman's army, and its boastful Kilpataick has been whipped by him as often as he has dogers and toes. Besides fighting wherever he could find the enemy, roads have been obstructed, cattle and negroes driven off, the people forewarned, provisions that could not be removed destroyed, and everything else done to emparrass and distract the invaders. In this way Wheeler has rendered most vital service to the cause, for it has given us time to complete defences and bring up our men On Sunday last, the 4th instant, a battle was fought which exceeds in magnitude any

that has characterized the campaign, and is therefore worthy of some particular mention. The 14th Yankee corps, united with Kilpa-trick's entire cavalry force, made an attack on Wheeler, and a severe battle raged for several hours. At the moment of the assault, Wheeler's line was very much extended for the purpose of foraging, but he speedily brought his forces together and received the attack of the enemy with a vigor that made thom stagger. Several times were they

thom stagger. Several times were they driven back by our men in counter charges, and sometimes from behind breastworks.

Finally, Wheeler finding himself nearly surrounded by a greatly superior force, quietly and imgood order retired and left the field to de enemy. The losses of the latter were very heavy, and the blow cannot have failed greatly to cripple them. We captured a number of prisoners, one, a Colonel who was taken in a hand-to-hand-fight. We also lost severely in officers and men; but in no proportion with the enemy. Among our killed was Col. Grayes, who on the occasion was acting as Brigadier.

FIRE IN HAMBURG .- Fire broke out in the Warehouse of Charles Hammond, Esq., in hismburg yesterday afternoon about 21 o'clock It originated in the centre of the building and destroyed about fifty bales of cotton be fore the fire engines from the city could get there, three of which responded promptly to

the alarm. It is thought to have been set on fire, as it appeared in two places, some distance apart, simultaneously. The building contained six hundred bales of coston, and had it not been so early discovered, would have destroyed the whole.—Constitutionelist, 9th inst.

STILL ANOTHER INCENDIARY FIRE.-Yes terday afternoon at half past four e clock fire was discovered in the large frame building, corner of Covington and Marcer streets in Hamburg, S. C., owned by the estate of Geo.
Parrott, Esq., and occupied by the Gerrament as a reserve hospital.
The building was entirely destroyed with

its contents, consisting of a lot of straw and hay belonging to Cash McDonald, Esq.

The fire-communicated to the kitchen, attached to Mr. Harmon Mosely's house, which

was destroyed also. This out building he-longed to Josiah Sibley, Esq., whose loss is slight, as the building was an old frame one. The house adjoining the main building Iso a frame one, was somewhat damaged, but by the exertions of the firemen, the contents, consisting of a large let of hardware, were saved. This building belonged to Mr. Wm. Hill, of Hamourg, whose loss will reach about one thousand dollars. Mr. Hill's case is a hard one, as his fine store on the main street had recently been pressed by the Government, and he had hardly removed his stock to the building above alladed to, when he was made roofless again. The loss altogether at this fire may be put down at five thousand dollars. The firemen of Augusta, were as usual very prompt. We noticed the Georgia, the Bartow, the Mechanics, and the Clinch Steam Engine.-Chronicle & Senti-
